

YOGIRAJ TAWDE

Senior Full-Stack Engineer | React, Node.js & Scalable Systems

Berlin, Germany | +49 155 10368399 | ld.yogiraj@gmail.com | linkedin.com/in/yogirajt

PROFILE

Senior Full-Stack Engineer with 8+ years of experience building customer-facing web applications, backend services, APIs, and cloud infrastructure. Strong in React, Next.js, TypeScript, Node.js, NestJS, PostgreSQL, and distributed systems. Experienced in owning features end-to-end — from product workflows and interfaces to backend architecture, asynchronous processing, and production infrastructure — with a proven record of shipping products that move real revenue.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Redux, HTML, CSS

Backend: Node.js, NestJS, Express, REST, GraphQL, Microservices, Event-Driven Architecture

Data: PostgreSQL, MongoDB, MySQL, Redis, MariaDB, SQLite

Cloud & Infrastructure: AWS, GCP, Docker, Kubernetes, GitLab CI/CD, Jenkins

Architecture & Messaging: RabbitMQ, GCP Pub/Sub, AWS SNS/SQS, WebSockets, Distributed Systems

Core Strengths: End-to-end feature ownership (UI to backend) · React/Next.js product engineering · API design & microservices architecture · Payments & third-party integrations · Cross-functional mentoring & delivery

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Apr 2026 – Present

Autohaus Royal GmbH, Berlin | Stack: NestJS, React, PostgreSQL, RabbitMQ

- Lead technical delivery for a 3-engineer team, acting as the key technical authority for both product-facing features and backend services.
- Designed a production RabbitMQ framework spanning 7–8 services and 15+ queues, processing thousands of events/second with generated TypeScript types.
- Led migration of a legacy monolith to NestJS microservices using the Strangler Fig pattern and database-per-service architecture.
- Improved system reliability, cutting daily support tickets from ~10–20 to 2–3 and clearing a backlog of unacknowledged events.
- Mentor engineers and low/no-code team members integrating AI workflows into product features; independently delivered improvements worth an estimated €100K–€200K/year.

Software Engineer

Aug 2023 – Mar 2026

Autohaus Royal GmbH, Berlin | Stack: NestJS, React, PostgreSQL, RabbitMQ

- Redesigned vehicle ingestion, auction, filtering, and rating workflows end-to-end (UI + API), increasing purchasing productivity ~4x and cutting evaluation time from 4–5 minutes to under 1 minute.
- Built a high-throughput data ingestion pipeline handling ~30 vehicle records/second using parallel, asynchronous workflows.
- Re-architected data access patterns to cut auction query times from 10+ seconds to under 50ms across 250K+ records, directly improving UI responsiveness for procurement staff.

Full-Stack Engineer

Apr 2022 – Mar 2023

Morressier GmbH, Remote | Stack: React/Next.js, Express, MongoDB, Stripe, GCP Pub/Sub

- Co-architected and built a Proceedings Management product generating ~\$1M ARR — about one-third of total company ARR.
- Designed and developed scientific publishing workflows used by IOP Publishing, ASCE, SPIE, AAAS, and SAE International.
- Built React/Next.js applications and backend services with Express, MongoDB, GCP Pub/Sub, and Stripe payment integrations.
- Built a Citation Analysis service to detect citation manipulation, duplication, and excessive self-citation patterns.
- Migrated legacy monolith functionality into domain-focused microservices using the Strangler Fig pattern.
- Improved performance by resolving N+1 query issues, achieving order-of-magnitude gains in key user-facing workflows.

Full-Stack Developer

Feb 2021 – Mar 2022

Finoux Solutions Pvt. Ltd., Mumbai | Stack: React, Node.js, Banking APIs, mTLS

- Built a metadata-driven React framework generating forms, CRUD operations, tables, and validation from JSON config — cutting form development time from ~1 day to ~2 hours.
- Designed and built a private payment gateway integrating three major banks, processing real-money transfers of millions of USD/day, with automated reconciliation.
- Integrated secure banking APIs using mutual TLS (mTLS) with certificate-based authentication.
- Contributed to an internal platform intended to replace a ~\$1M/year third-party system.
- Mentored three engineers on React, backend development, and database transaction concepts.

Software Engineer

Nov 2019 – Feb 2021

Neosoft Technologies, Mumbai | Stack: Java, WebSockets, AWS Lambda, MySQL

- Delivered end-to-end software for a workplace analytics and space-management platform used by PwC, WTW, Rolls-Royce, and Mastercard, powered by ~35,000 IoT sensors across five continents.
- Built a COVID-era office booking and space-assignment platform using AWS Lambda, API Gateway, S3, and Athena.
- Designed real-time WebSocket workflows and event-driven caching for live sensor tracking, occupancy, and business-rule evaluation.
- Improved MySQL/JPA query performance from 10–15s to under 500ms via query optimization and Redis caching.
- Reduced AWS Athena analytics query times from 1+ minute to ~8–9 seconds across datasets approaching 1 billion rows/year.

EARLIER EXPERIENCE

Web Developer — Legaldocs RSE, Navi Mumbai

Sep 2018 – Nov 2019

Legal-tech CRM, automation tooling and Chrome extensions. Co-built the Ezoto billing/accounting app — 40K+ downloads in 5 months.

Web Developer — Ahsan Alliance, Mumbai

Jan 2018 – Aug 2018

Sports social platform with live chat and stats for 150+ sports; improved MariaDB scalability.

Web Dev Intern — Fierydevs, Thane

Oct 2017 – Jan 2018

Responsive web interfaces and survey/form-generation tooling.

LANGUAGES

English — Professional Working Proficiency | German — A2 | Hindi — Native | Marathi — Native

EDUCATION

M.S. Clinical Research & Regulatory Affairs — Sikkim Manipal University (2010–2012)

Bachelor of Pharmacy — University of Mumbai (2006–2010)

Web Development Training — Itvedant Education Pvt. Ltd. (2017–2018)
